

MOBILE FORMAT

The element appears to be too small in the mobile interface, can be elongated / shifted above a bit.

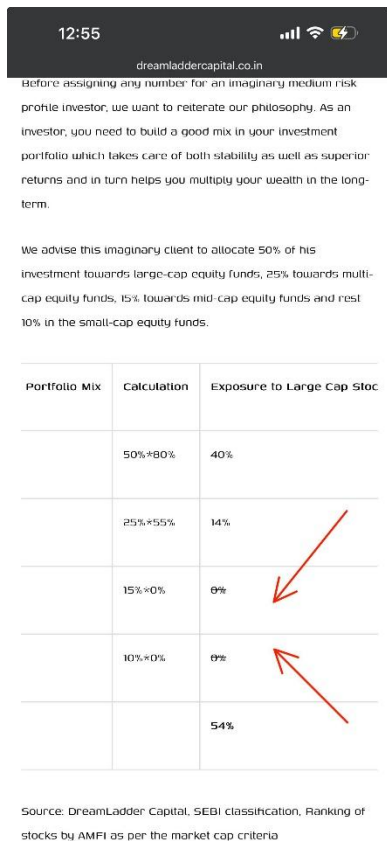

The man is off center, might look better if centered. And the blog is not justified, if the writeup is justified, it will look cleaner. The vertical bar after Saday Sinha seems to be unnecessary.

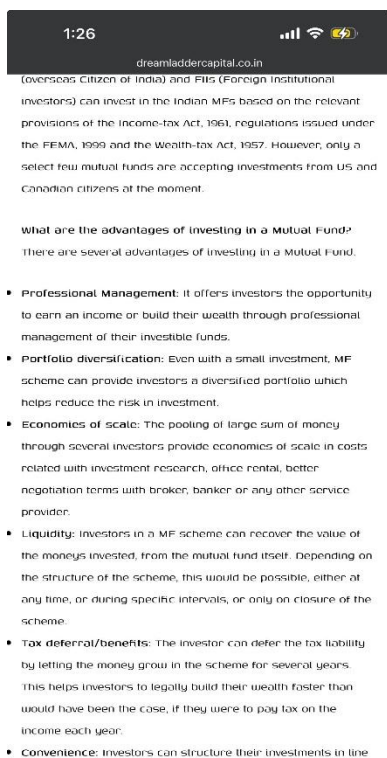

After a period of subdued growth marred by a spate of disruptions, Indian economy is recovering and has regained the fastest-growing economy tag. However, the growth revival story still carries some chinks in its armor, owing to higher than expected Fiscal deficits, Current account deficit, Inflation or Currency depreciation etc. This duality of revival and risk had the bearing on the market performance in recent months, further aggravated by the uncertainty around incoming elections and several unfavorable global factors.

Mid & Small cap stocks had a phenomenal run during 2014-17 and therefore funds positioning themselves in these categories attracted money at an unprecedented pace. Investors flocked to these mutual funds and investment managers struggled to deploy the fresh inflows in attractive investment opportunities.

BLOG 2 AND 3 ARE THE SAME.

Something seems off – strike over 0%

The space between the table and source is same as between 2 paras, could be reduced. Also, the source font size is same as that of the writeup.

1:13 dreamladdercapital.co.in

Table-I:

Duration: 25 Years		Expected rate of return (p.a)		
Monthly investment/SIP	12%	14%	16%	
1000	0.17 cr	0.23 cr	0.32 cr	
2500	0.43 cr	0.59 cr	0.81 cr	
5000	0.85 cr	1.17 cr	1.62 cr	
10000	1.70 cr	2.34 cr	3.24 cr	

Table-II:

Duration: 30 Years		Expected rate of return (p.a)		
Monthly investment/SIP	12%	14%	16%	
1000	0.31 cr	0.46 cr	0.69 cr	

The bullet points are getting cut off on the screen. Justified Alignment preferred throughout.

Blog 2: Power of Compounding

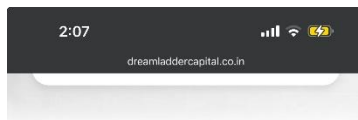

The distance between “Table-I:” and the table can be reduced, currently same gap as between 2 paras. Similarly for all the tables. Table headings can be center aligned. Table headings and sources can be closer to the table. Will look visually better.

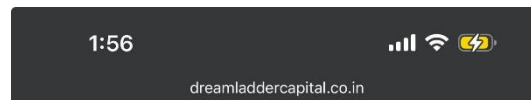

Portfolio Management Services (PMS) offer investors a professionally managed, customized equity and debt portfolio.

Unlike mutual funds, PMS accounts (stocks) are held in the investor's name, providing higher transparency, flexibility, and personalized strategy aligned with your financial goals and risk profile.

P Portfolio Management Services (PMS) provide an elite investment framework where high-conviction strategies meet personalized direct ownership, ensuring your wealth is managed with surgical precision.

Italic font too close. Reduce the spaces a bit.

direct ownership, ensuring your wealth is managed with surgical precision.

Key Features

AIFs in India operate under the SEBI (Alternative Investment Funds) Regulations, 2012, ensuring a sophisticated environment for private capital.

Similarly, here, too much space left in between.

The image for the Key Features section is a bit confusing. It's not clear what it's trying to show.

SEBI-Regulated Framework

Minimum Investment

₹50 Lakh initial ticket size as per strictly mandated SEBI guidelines.

Separate Custody

Client assets are held securely in the investor's individual demat and bank accounts.

Disclosure Norms

Managers must provide periodic performance reports and transparent expense disclosures.

Regulatory Registration

Every PMS provider is registered with SEBI and follows rigorous compliance audits.

PMS in India is governed by the SEBI (Portfolio Managers) Regulations, 2020, ensuring transparency and investor protection through strict compliance

The heading should sit closer to its description instead of having equal spacing throughout.

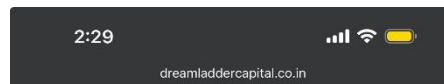

Regulatory Registration

Every PMS provider is registered with SEBI and follows rigorous compliance audits.

PMS in India is governed by the SEBI (Portfolio Managers) Regulations, 2020, ensuring transparency and investor protection through strict compliance standards.

Box - not center aligned.

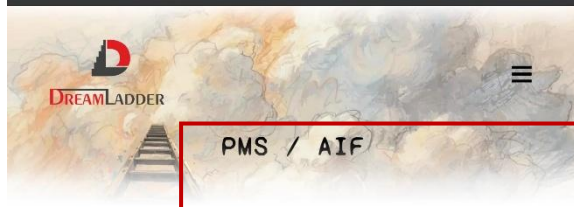

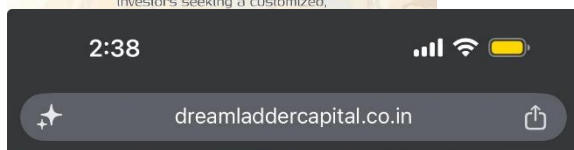

Types of AIF

SEBI classifies Alternative Investment Funds into three distinct categories based on investment objectives and asset classes. Each category serves specific investor needs, ranging from social impact and infrastructure to complex trading strategies.

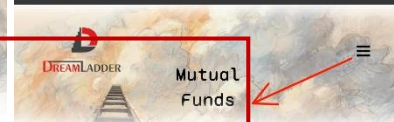

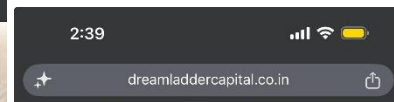

Space in between isn't same.

Regulatory Framework

AIFs in India operate under the SEBI (Alternative Investment Funds) Regulations, 2012, ensuring a sophisticated environment for private capital.

Why can't Mutual Fund come in one line as PMS / AIF?

Portfolio Management Services (PMS) offer investors a professionally managed, customized equity and debt portfolio. Unlike mutual funds, PMS accounts (stocks) are held in the investor's name, providing higher

Also, the image for MF isn't center aligned.

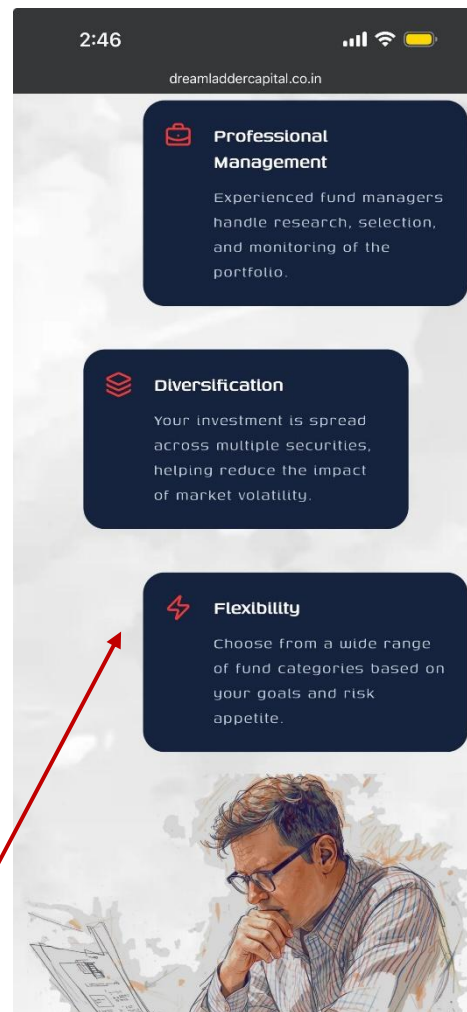

Mutual Funds are investment vehicles that pool money from investors and allocate it across various asset classes such as equity, debt, and hybrid instruments.

These funds are managed by qualified professionals who follow a defined investment objective and strategy.

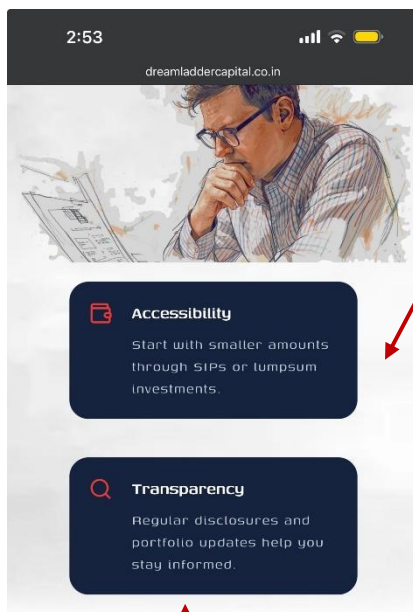

Too much space in between.

Blue boxes – alignment seems to be off.

Check the same boxes under Bonds section, they are properly aligned.

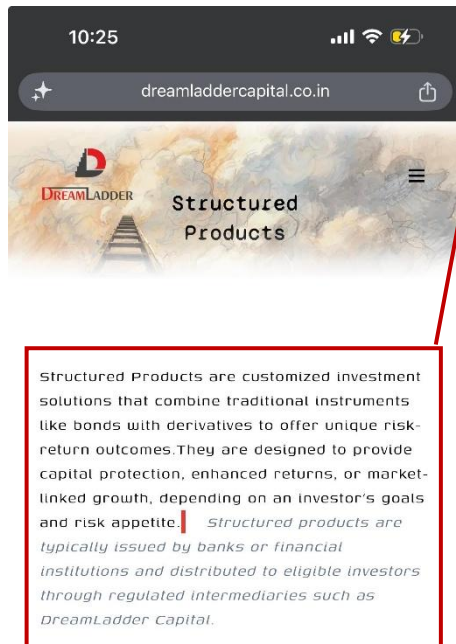

These 2 boxes aren't placed zig-zag like the previous ones.

The space between "Transparency box" and the image below can be reduced a bit.

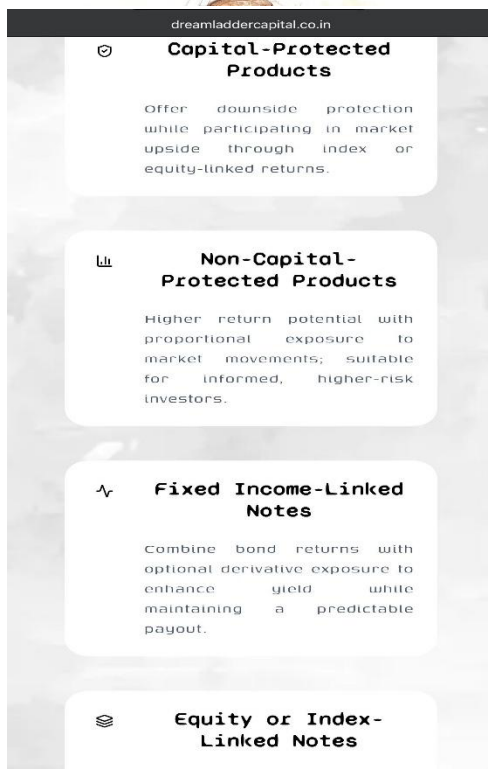

Picture is off-center. No question mark after **“Why Invest in Bonds”**

From the red bar it should be shifted down.

The icons can be a bit larger, might be a bit appealing visually. Icons same length as heading and the description remains throughout the box, the blank space on the left border can be avoided.

The icons can be of red colour as in insurance.

This framework ensures structured products are offered only where they align with investor objectives, risk tolerance, and regulatory safeguards.

Why Structured Products?

They enable investors to achieve customized portfolio outcomes—balancing capital preservation, yield enhancement, or equity participation—within a regulated and transparent framework.

DREAMLADDER

Can reduce the gap.

dreamladdercapital.co.in

A Trust manages and protects wealth

Certificates establish heirship

Property transfers and asset recovery handle execution

Post-demise services ensure closure

Together, these create a seamless, secure legacy for your family.

Can reduce the gap.

Insurance is a financial safety net that protects individuals and families against life, health, property, and income-related risks.

It ensures financial security during unforeseen events while supporting long-term planning and wealth preservation.

Comprehensive Insurance Strategies provide a vital safety net where tailored coverage meets robust risk management, ensuring your family's financial future is protected with absolute certainty.

z

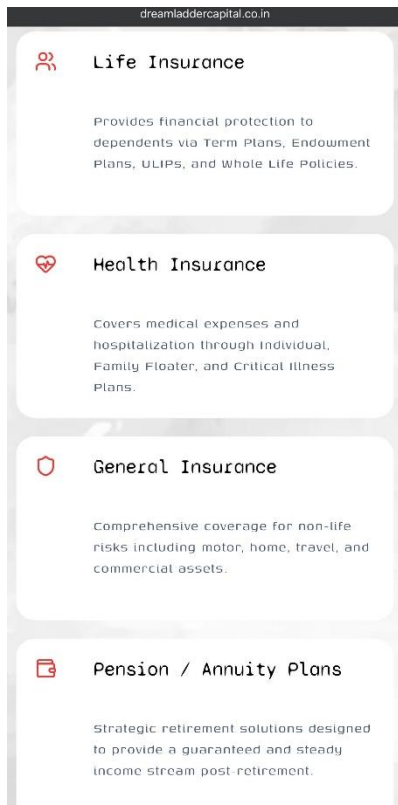

EXPERTISE 01

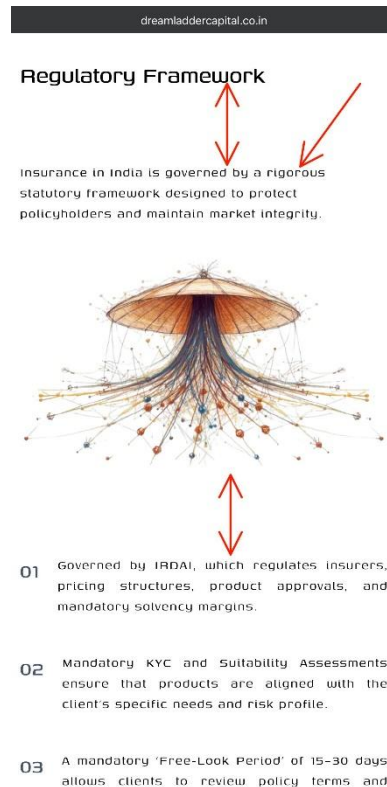

Will Creation

A Will ensures your wealth and assets are distributed as per your wishes after your demise. It defines beneficiaries, executors, and witnesses.

There is a “z” appearing, assuming by mistake.

Same as Structured Products – in Insurance, the icons can be of bigger size. Space between the heading and description can be reduced, space on the left can be used as well for the description.

The gap between “Regulatory Framework” and description can be reduced.

The description can be center aligned or aligned in a way so that it doesn’t leave a lot of space on the right.

The gap between the images and pointers below can also be reduced.

The gap can be reduced.

Why Insurance Matters

1

Protects family from financial uncertainty.

2

Covers rising medical and hospitalization costs.

3

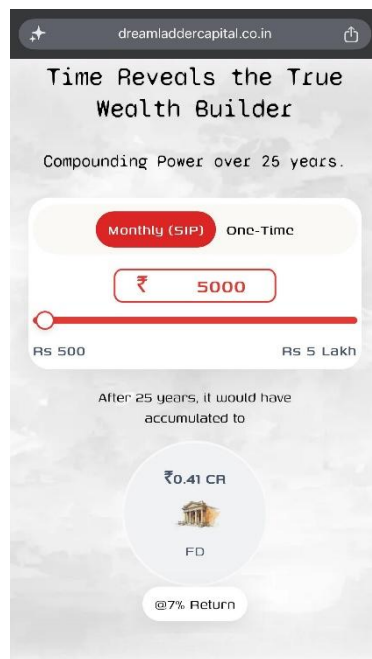

Helps preserve long-term goals during emergencies.

4

The gap between pointers can be increased so that it shows difference between 1 and 2.. and so on..

Gap to be reduced.

We are choosing monthly SIP amount but it ain't giving the accumulated portfolio amount. Stating FD corpus @7% return.

CALCULATORS –

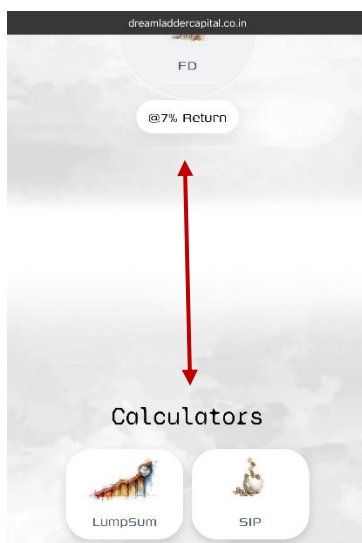

Amounts/rates cannot be selected freely. The slider only stops at predefined values. Please consider allowing finer increments or manual input.

Retirement Calculator: Monthly expenses can only be selected from predefined values (e.g., ₹25,000 cannot be selected if the slider only stops at ₹24,000 and ₹26,000).

Marriage Calculator: Maximum marriage age is limited to 30 years. Please consider increasing the limit.

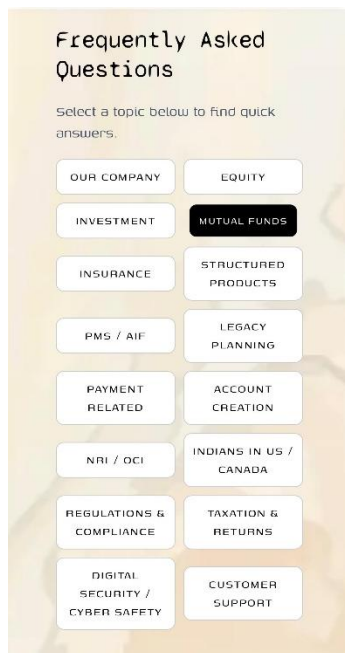

Existing Savings: Maximum limit is capped at ₹50 lakh. Please consider increasing the limit.

EMI/Loan Calculator: Clicking on it redirects to the SIP Calculator instead. Please check the redirection.

Too much gap.

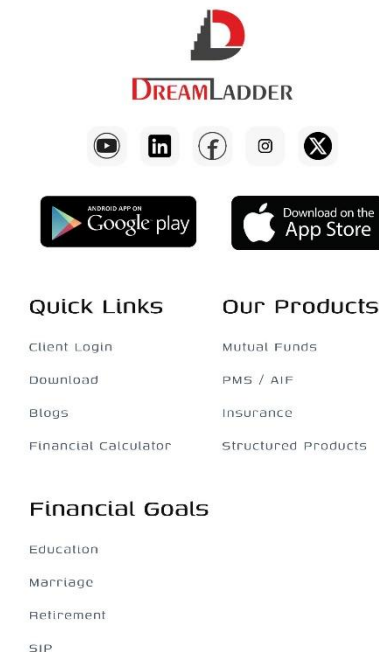

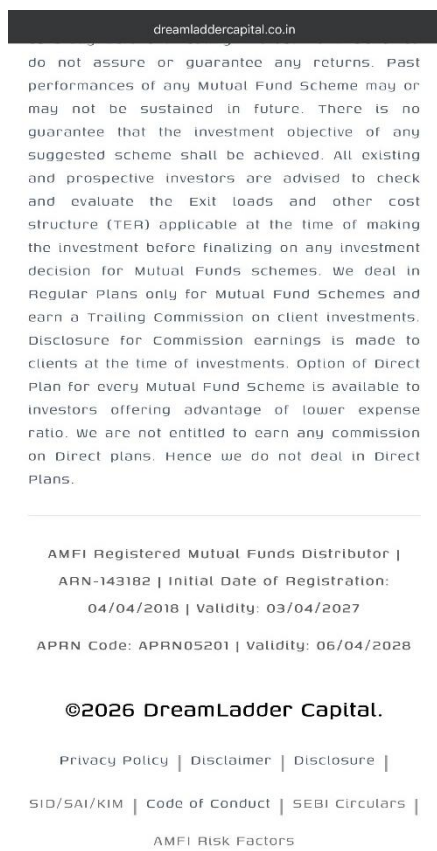

Click on any options redirects to FAQ first topic “Our Company”, not the specific topic.

Download – redirects to a blank page.

Reach us – all 3 sections (MOB, Email, Address) redirects to Our Goals / Values / About Us page. MOB should let them dial us – similarly mail should allow them to send us a mail via gmail / yahoo Address can redirect to GMap – our location pinned.

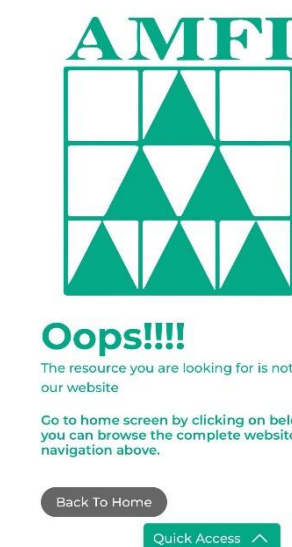

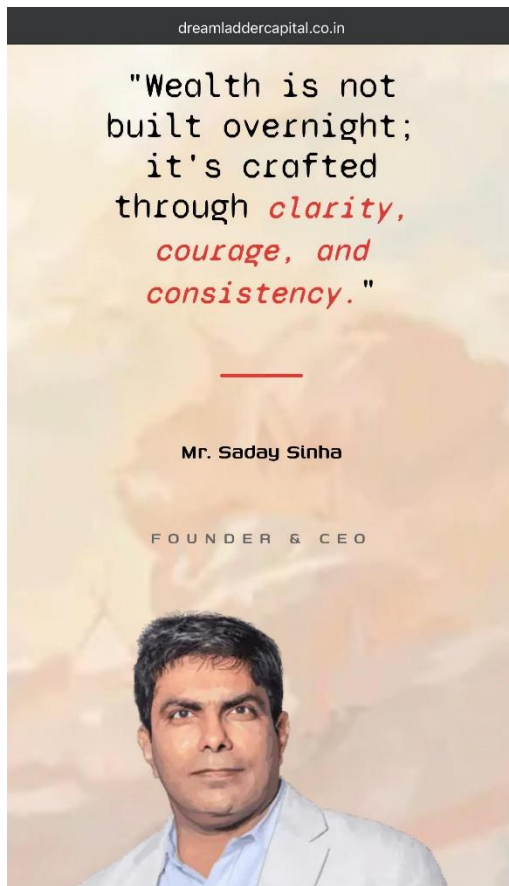

Footer:

Code of Conduct – not linked to anything.

AMFI Risk Factors redirects to this AMFI page which shows an error.

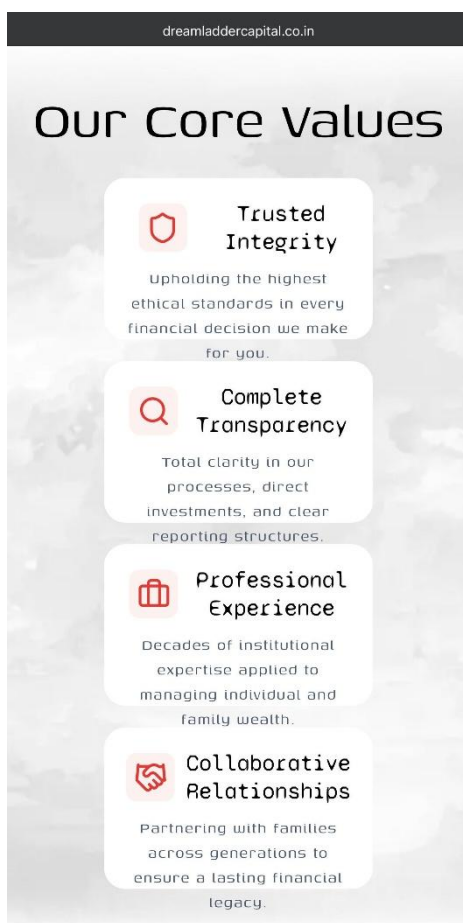

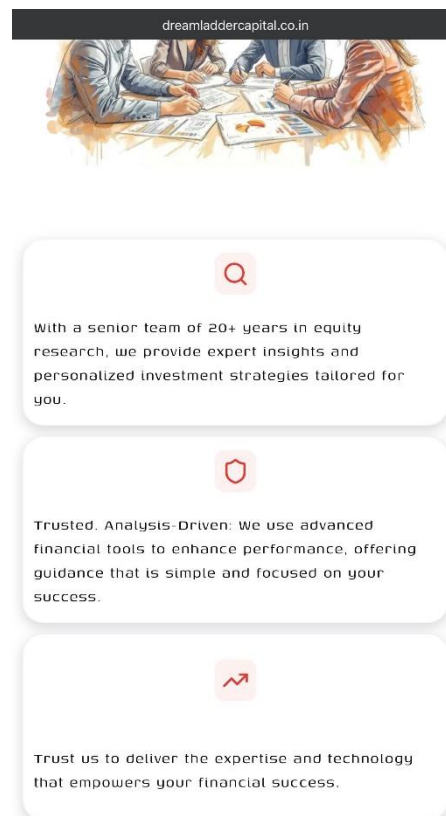

Mr. Saday Sinha and the designation should be closer, there can be a little more gap between the designation and the portrait.

Can be center aligned, to much space in between words because of justification.

Texts out of the box.

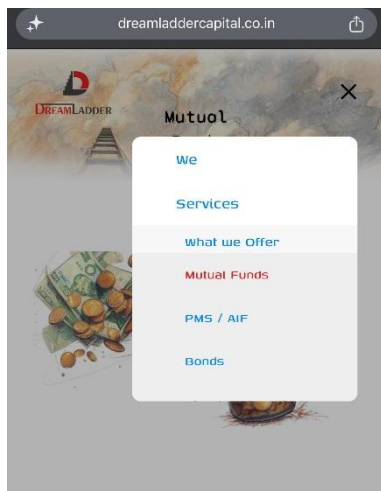

Texts can be center aligned or justified for a cleaner look. 3rd point – gap between the context and logo isn't same as other two.

High-Net-Worth Individuals (HNIs)

We work with affluent individuals who seek long-term wealth creation, capital preservation, and access to curated investment strategies – from PMS and equities to structured products and estate planning.

red line too close to the description – same applies to all sub-sections of this section - “Who we Serve”.

Portfolio Discussion Meeting with Investment Team

45 min

Dear Patron,

Warm greetings from the DreamLadder Team!!

It's been a while since our last portfolio discussion. Let's reconnect and delve deeper. Please choose a convenient time from the provided calendar link for a one-on-one discussion with our experts.

Your insights are invaluable, and we look forward to a fruitful conversation.

Thank you for your continued support.

Best regards,
Team DreamLadder

SHOW LESS

This msg seems to be for existing clients. It'd be better if we could make it sound neutral.

Unable to scroll to next product after Bonds.

Disciplined allocation. Continuous monitoring. Balanced growth.

Unable to relate the content above and picture below.

BESPOKE PORTFOLIO PAGE -

Seems a bit off, uneven spacing between points, randomly 2 pictures put here and then just pointers throughout. Not visually appealing.

Core Philosophy

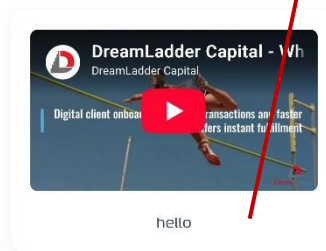

Enduring wealth is shaped by suitability-

Can we reduce the font, it has suddenly increased in this section, looks absurd plus the constant monitoring point is unnecessarily taking 2 line space which again is not looking good alignment wise.

Instead of "1." – hello.

VALUE CHECK FOR CALCULATORS –

Excel Attached.

WEB FORMAT

Website Changes to Make

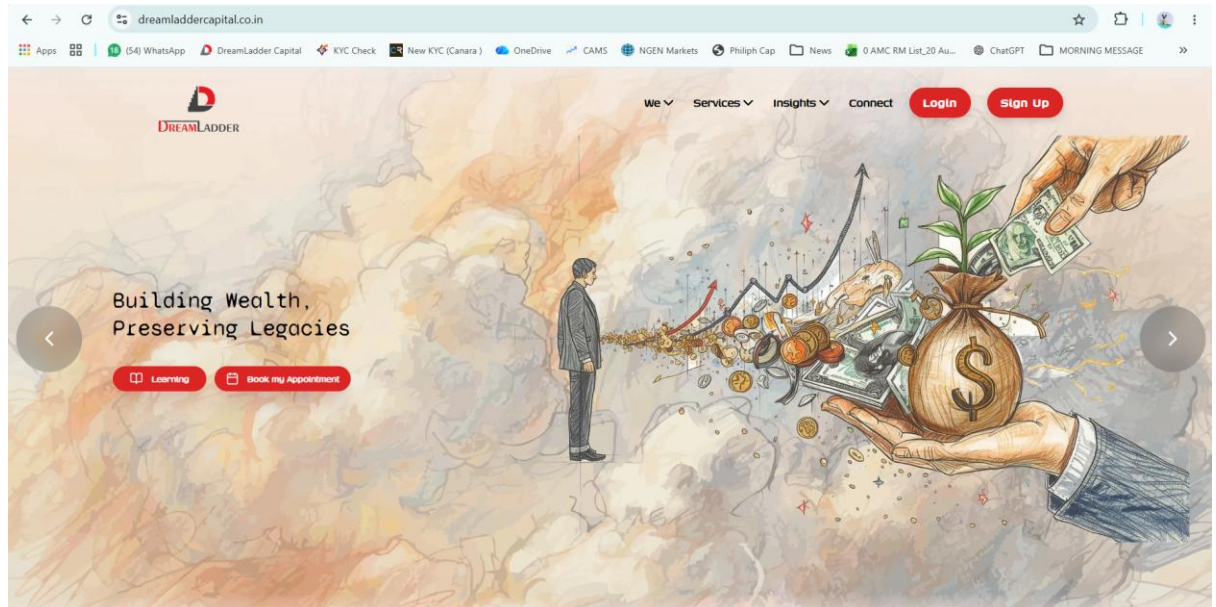

- 1) General thing: any text is not be able to be copied example someone want to copy the Mobile number

1. Adjust the app mockup so the phone is fully visible, as the top and bottom are currently getting cut off.
2. Update the "Gain as on" date to the latest date.
3. Increase the font size of the "Smart Investing" text.
4. Make the ladder illustration slightly broader and flatter.
5. Replace the Play Store badge with the correct "Get it on Google Play" badge.
6. Suggestion: Change the CTA text to "Download the App Now."
7. Increase the size of the statistics section below the app download area. Improve the font size and contrast, and make the font weight and colour uniform across all metrics (Families, Countries, and Experience).

- 1) I feel the body text looks slightly bold. We can consider reducing the font weight to improve readability.
- 2) Suggestion: In the Login and Sign Up buttons, when the arrow changes shape on hover, the text also turns red. I feel keeping the text colour white would look more appealing and provide better contrast.

1. Suggestion: The size of the ">" arrow icon looks slightly large. We can consider reducing its size for a cleaner appearance.
2. I feel the main tagline on this page can have a slightly larger font size to make it stand out more.
3. Suggestion: On hover, the "Learning" and "Book My Appointment" tabs this colour combination looks good and can be considered for similar hover states across the website.

Suggestion: The smudging/blur effect that was present on the old website is missing here. I feel adding this effect back would enhance the visual appeal of the section.

What We Offer

Suggestion: I feel there is slightly too much spacing between the bottom of the image and the text. We can consider reducing the gap so that the image and text look more connected and continuous.

What We Offer

Your legacy deserves a solid foundation. DreamLadder Capital helps you build lasting wealth through smart, diversified strategies.

PMS / AIF

Facilitated Access to Market-Linked Solutions

Legacy & Estate Planning
Curated Solutions for Wealth Transfer

Insurance
Access Life, Health, and Asset Coverage

1. Suggestion: I feel there is a little too much empty space in the centre. We can consider reducing the gap to make the section look more balanced.
2. Suggestion: The text starting with "**Your Legacy Deserves...**" looks quite small and almost resembles a disclaimer. I feel increasing the overall font size would improve readability and make it more prominent.
3. Suggestion: The box on the right can be made slightly larger to utilise the centre space better and create a more balanced layout.
4. The bonds /corporate when clicked it is landing on the right page but the heading of that page only says bonds

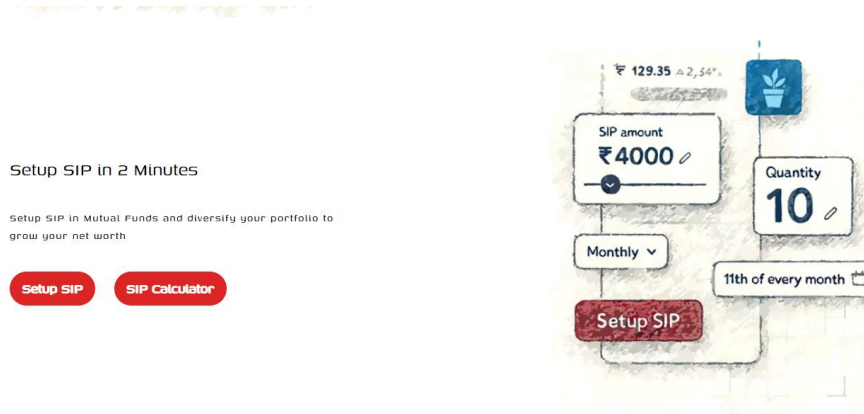

All Your Family Investments,
One Simple App

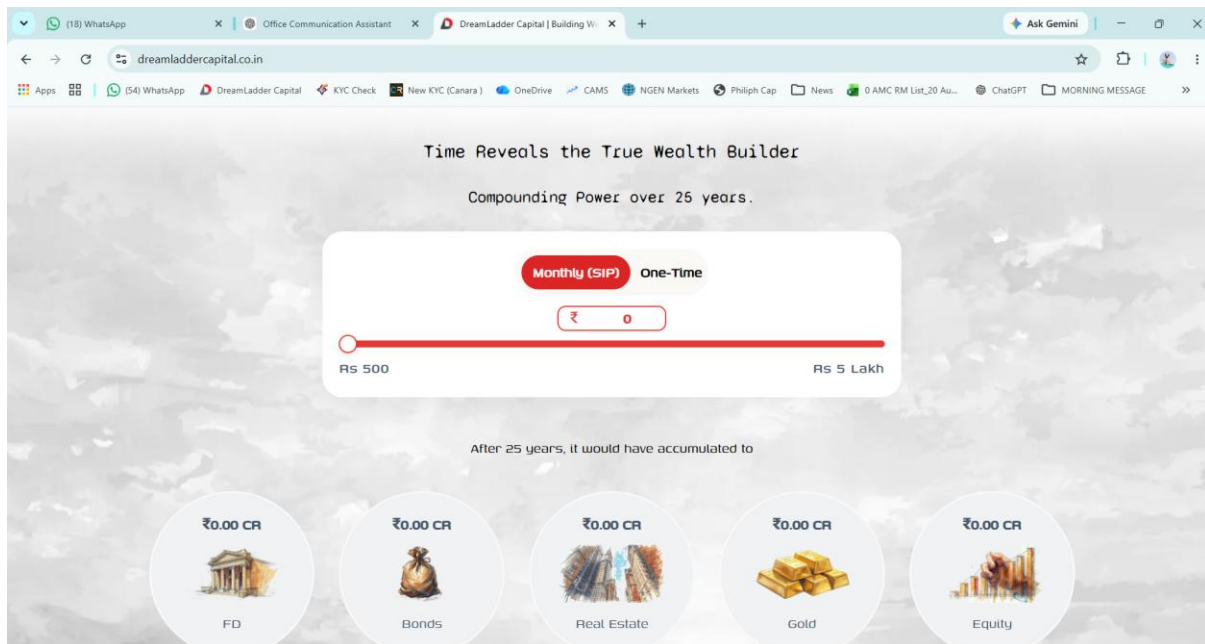

Easily view portfolio performance, transactions and reports for every family member - anytime, anywhere

Start now

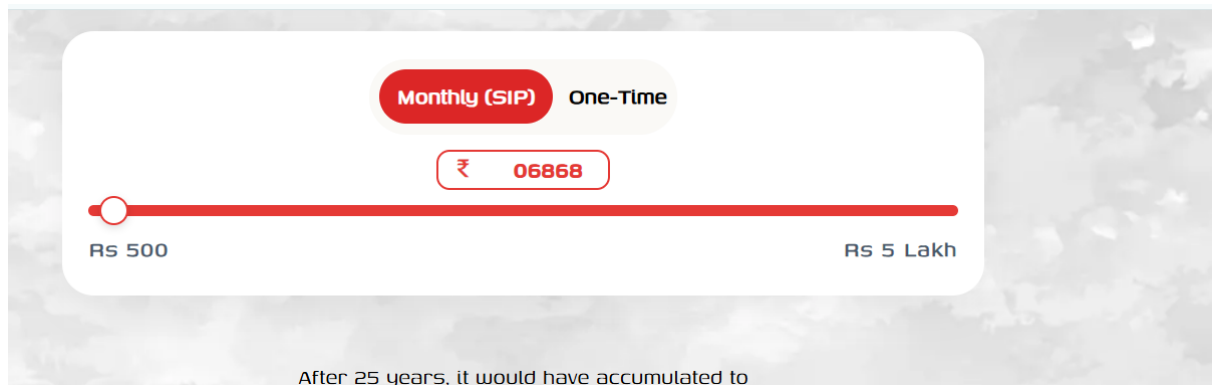

- 1) Suggestion: I feel the gap between the sections is slightly large. We can consider increasing the spacing between the heading, subtext, and image to utilise the empty space better and make the section look more balanced.

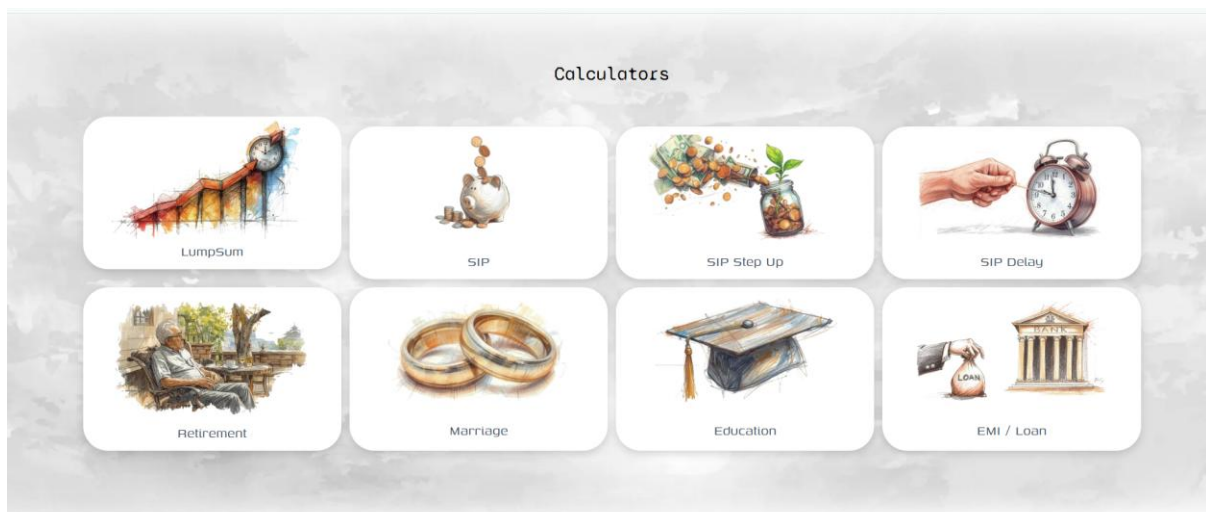

- 1) Suggestion: I feel the text on the left looks slightly small compared to the image on the right. We can consider increasing the text size to create a better visual balance between both sections.

1. Suggestion: I feel the entire SIP and One-Time Investment calculator section does not fit within a single screen. It would be better if the complete calculator is visible on one page without requiring users to scroll.
2. Suggestion: The heading and subheading text can be made slightly larger to improve readability and give the section better visual prominence.
3. Suggestion: The calculator box can be made slightly smaller in height so that the asset return cards below are also visible within the same screen, eliminating the need to scroll.

- 1) Suggestion: While typing the desired amount for both SIP and One-Time Investment, the existing "0" remains in the input field. Currently, I need to select the value, press **Delete**, and then enter the new amount. It would be better if the existing value is automatically cleared when the user starts typing.
- 2) Suggestion: For example, when the SIP amount is ₹6,868, the slider knob appears very close to the ₹500 end. Visually, this looks incorrect and may confuse users. We can consider improving the slider scaling or positioning to better represent the selected amount.
- 3) I verified the calculations for both the **SIP** and **One-Time Investment (Lumpsum)** calculators, and the returns are correct.

- 1) The calculator are taking to the right set of tools for calculating for lumpsum . sip .education marriage etc

Latest Insights

Market perspective and financial wisdom to keep you ahead.

Featured Videos

Latest Blogs

1. Suggestion: I feel the subtext below **Latest Insights** looks slightly small. We can consider increasing the font size to improve readability.
2. I checked the section, and all the videos are playing correctly. The blog links are also redirecting to the appropriate pages.

What Clients say about us

"Associated with DreamLadder Capital since inception, I value their disciplined asset allocation, consistent reviews, and transparent communication that bring clarity and confidence to my investments."

Puja Rai

CXO & Author | Mumbai

1. Suggestion: I feel the blue underline can be shifted slightly upwards to improve its alignment with the section.
2. I checked the links for **Meet Ravi** and **Meet Puja Rai**. Currently, both redirect to the first page (Home page) of the website instead of their respective pages.

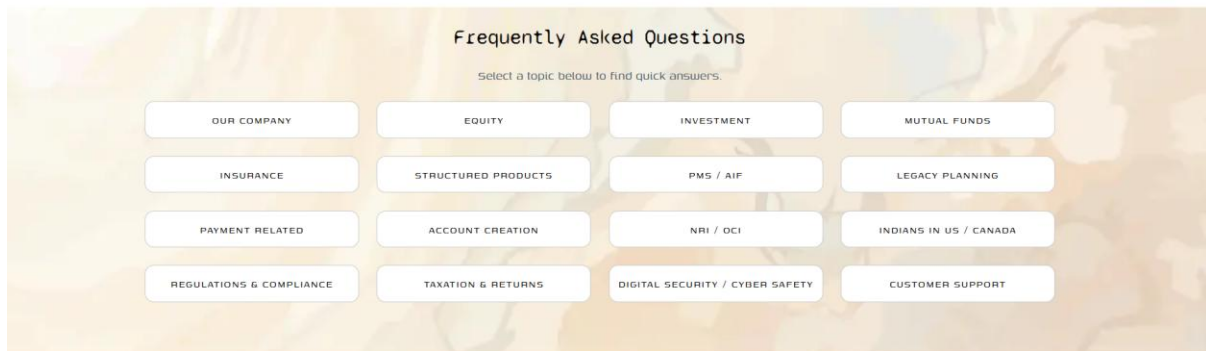

Subscribe To KnowledgeBytes

Enter Email

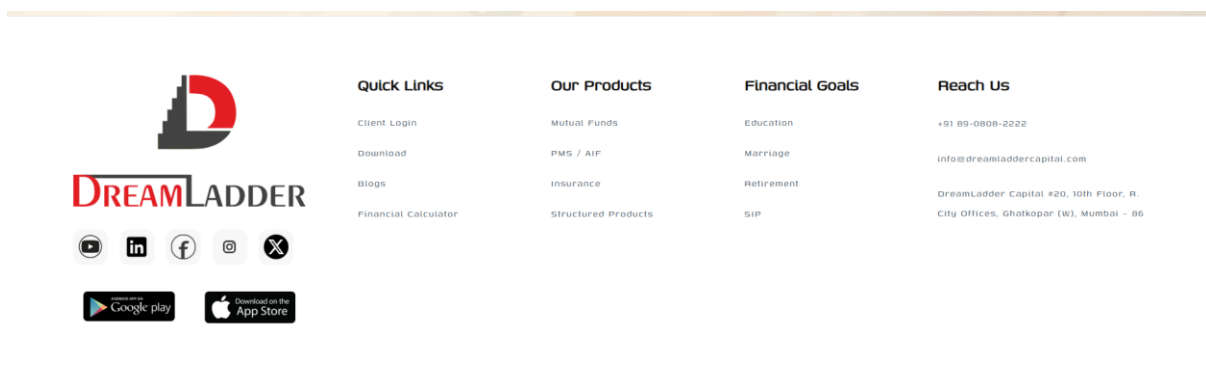

Subscribe

1. The mail function is currently not working.

2. Suggestion: I feel there is too much empty space on both the left and right sides of the section. We can consider reducing the width of the box so that the layout looks more balanced and utilises the available space better.
3. Suggestion: If the text size is increased slightly and the height/length of the box is reduced, it will fill the available space better and improve the overall appearance.

Suggestion: I observed that clicking on any of the FAQ tabs always scrolls to the top of the FAQ section instead of navigating to the respective question/answer box. We can consider updating the functionality so that each tab takes the user directly to its corresponding FAQ box.

- 1) Suggestion: The text on the **Google Play** button can be reviewed, as it does not appear to be displayed correctly.
- 2) I checked the **Quick Links** section. The **Download** option is currently redirecting to a blank white page instead of the intended page.
- 3) I checked the **Reach Us** section. The **mobile number, email address, and office address** are all redirecting to the **About Us** section. Ideally, these should redirect users to the **Connect** section.

Risk Factors -

Investments in Mutual Funds are subject to Market Risks. Read all scheme related documents carefully before investing. Mutual Fund Schemes do not assure or guarantee any returns. Past performances of any Mutual Fund Scheme may or may not be sustained in future. There is no guarantee that the investment objective of any suggested scheme shall be achieved. All existing and prospective investors are advised to check and evaluate the Exit loads and other cost structure (TER) applicable at the time of making the investment before finalizing on any investment decision for Mutual Funds schemes. We deal in Regular Plans only for Mutual Fund Schemes and earn a Trailing Commission on client investments. Disclosure for Commission earnings is made to clients at the time of investments. Option of Direct Plan for every Mutual Fund Scheme is available to investors offering advantage of lower expense ratio. we are not entitled to earn any commission on Direct plans. Hence we do not deal in Direct Plans.

About Us

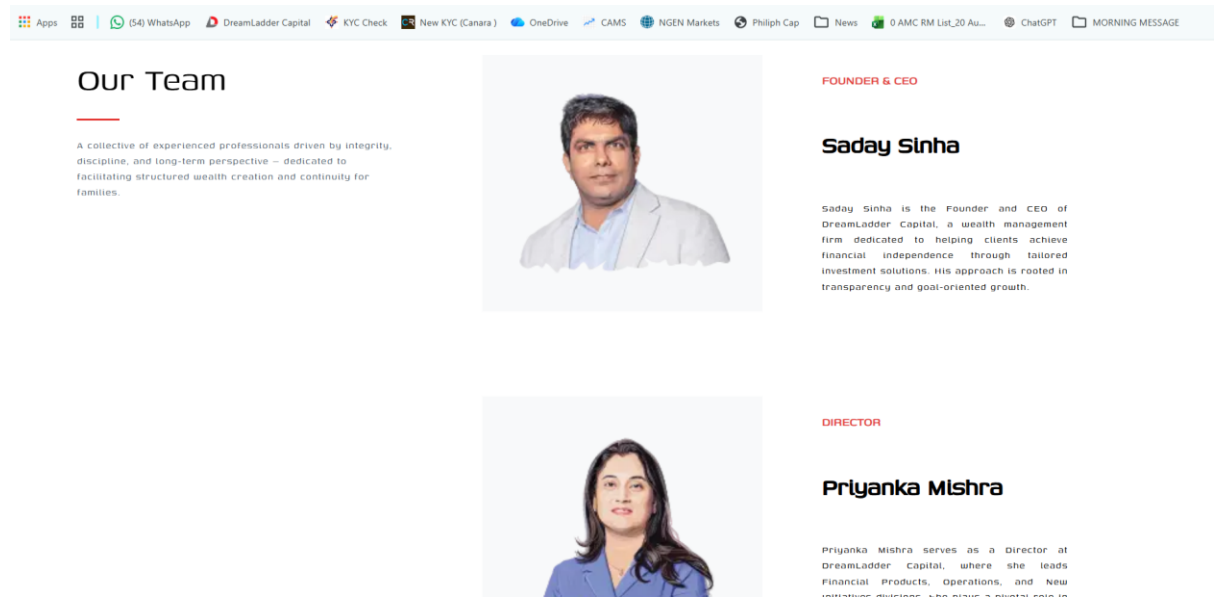

Suggestion: I feel there is too much empty space on the left side of the section. We can consider shifting the image further towards the left and aligning it properly to utilise the available space more effectively.

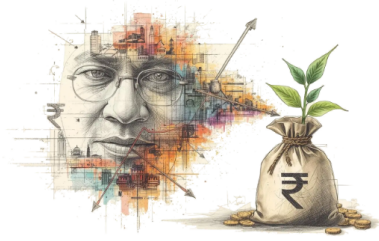

Suggestion: I observed that when the cursor moves over the tabs, the pop-up/hover animation is missing. We can consider adding the hover animation so that users receive clear visual feedback when interacting with the tabs.

1. Suggestion: I feel the title can be shifted slightly upwards by reducing the spacing above it, making the section look more balanced.
2. Suggestion: The tabs can be aligned in the centre to improve the overall layout and visual appearance.

1. Suggestion: I feel both the images appear slightly distorted, with some pixel tearing. We can consider using higher-resolution images to improve their clarity.
2. Suggestion: The paragraph text size can be increased slightly to improve readability. Also, the text under **Our Team** looks a little dull compared to the text on the right. We can consider making the colour more consistent.
3. Suggestion: The spacing between the designation (e.g., **Founder & CEO**), the name, and the paragraph is slightly too much. We can consider reducing the spacing to create a more compact and visually balanced layout.

Who We Serve

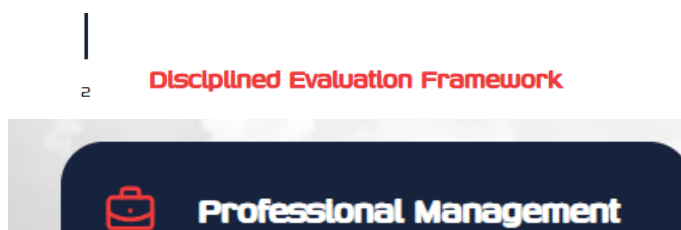

High-Net-Worth Individuals (HNIs)

We work with affluent individuals who seek long-term wealth creation, capital preservation, and access to curated investment strategies – from PMS and equities to structured products and estate planning.

Suggestion: I feel the spacing between the title and the paragraph underneath it is a little too tight. We can consider increasing the spacing

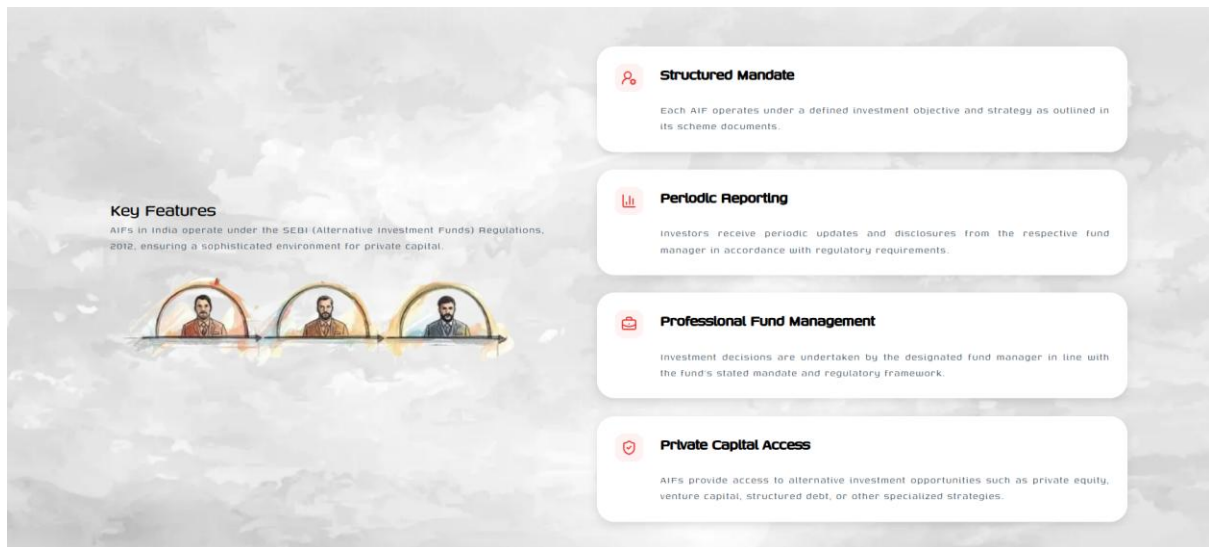

Mutual Funds

1. Suggestion: The text size can be increased slightly, as the current text looks a little small and dull. A slightly larger font size and improved contrast would enhance readability.
2. Suggestion: The bold text appears too tightly spaced, causing the letters to merge together. We can consider increasing the letter spacing slightly to improve clarity.
3. Also the animation is missing in the (Why invest in Mutual fund Section ?)

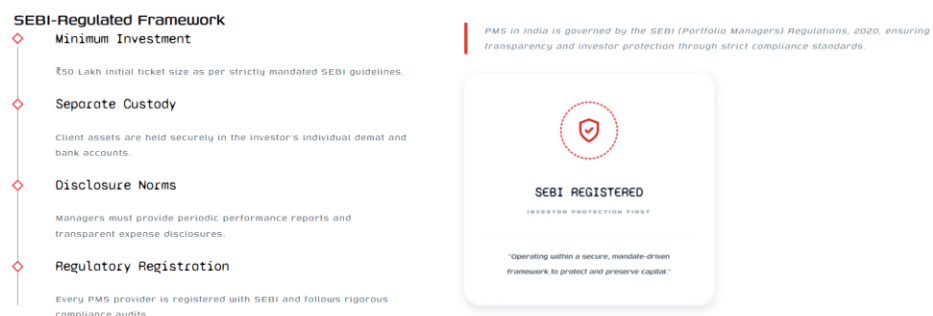

PMS/AIF

4. Suggestion: The text size can be increased slightly, as the current text looks a little small and dull. A slightly larger font size and improved contrast would enhance readability.
5. Suggestion: The bold text appears too tightly spaced, causing the letters to merge together. We can consider increasing the letter spacing slightly to improve clarity.

1. Suggestion: I observed that the animation above this section is missing. We can consider adding the animation to maintain consistency with the rest of the website.
2. Suggestion: When the cursor is moved over the icons on the right-side tabs, the icons do not change to red on hover. We can consider adding the hover colour change to provide better visual feedback and maintain consistency with the website design.

1. Suggestion: I feel the spacing between the title and the bullet points is a little too tight. We can consider increasing the spacing slightly to improve readability and create a more balanced layout.
2. Suggestion: The bullet points have a hover animation, but the **SEBI Registered** tab on the right does not have any animation. We can consider adding the same hover animation to maintain consistency across the section.

Regulatory Framework

AIFs in India operate under the SEBI (Alternative Investment Funds) Regulations, 2012, ensuring a sophisticated environment for private capital.

01 Mandatory SEBI Registration :

All AIFs must be registered with SEBI.

02 Minimum Investment Threshold :

To ensure sophisticated participation, a minimum ticket size of ₹1 crore is required from investors.

03 Leverage Restrictions :

Category I & II AIFs cannot use leverage except for temporary needs; Category III can, within limits.

04 Transparency & Disclosure :

Fund managers must report performance, valuation, and risks transparently.

05 Eligible Investor Profile :

Participation is strictly limited to High-Net-Worth Individuals (HNIs) and institutional investors who meet the criteria.

55 | (54) WhatsApp | DreamLadder Capital | KYC Check | New KYC (Canara) | OneDrive | CAMS | NGEN Markets | Philip Cap | News | 0 AMC RM List_20 Au... | ChatGPT | MORNING ME

01 Category I AIF

Invests in early-stage ventures, startups, social ventures, or infrastructure.

OBJECTIVE

Promote entrepreneurship and economic growth.

EXAMPLES

Venture Capital, Angel & Infrastructure Funds

02 Category II AIF

Invests in equity or debt instruments not covered under Category I or III.

OBJECTIVE

Long-term capital appreciation.

EXAMPLES

Private Equity & Debt Funds

03 Category III AIF

Uses leveraged strategies to generate short- to medium-term returns.

OBJECTIVE

Absolute return through trading and arbitrage.

EXAMPLES

Hedge & Long-Short Funds

Types of AIF

SEBI classifies Alternative Investment Funds into three distinct categories based on investment objectives and asset classes. Each category serves specific investor needs, ranging from social impact and infrastructure to complex trading strategies.

3. **Suggestion:** I observed that there is very little spacing between the category tabs, causing them to appear too close to each other. We can consider increasing the spacing between the tabs to improve readability and the overall visual appearance.
4. **Suggestion:** I observed that the hover animation for the bullet points on the right side is missing. We can consider adding the same animation to maintain consistency with the rest of the website.
5. **Suggestion:** The bold headings appear too bold, and the letters look merged together. We can consider reducing the font weight slightly or increasing the letter spacing to improve readability.

Bonds

- 1) Suggestion: I observed that the animation for the entire section is missing. We can consider adding the section animation to maintain consistency with the rest of the website.
- 2) Suggestion: The text can be made slightly larger to improve readability and enhance the overall visual appearance.

Regulatory Framework

- ◇ **SEBI Debt Regulations**
Governed by SEBI (Issue and Listing of Debt Securities) Regulations, 2008 for strict disclosure standards.
- ◇ **RBI Oversight**
The Reserve Bank of India regulates Government Securities, SGBs, and bank-issued AT1 bonds.
- ◇ **Credit Rating Mandate**
Mandatory ratings by SEBI-regulated agencies are required for corporate bonds to signal creditworthiness.
- ◇ **Investor Safeguards**
Strict KYC, Suitability Norms, and mandatory disclosure of Credit, Interest Rate, and Liquidity risks.

Investable bonds in India are governed by a multi-layered regulatory structure designed to ensure market integrity and investor security.

3)

Suggestion: I feel the image on the right appears slightly distorted, with noticeable pixel tearing. We can consider using a higher-resolution image

Structured Products

1. Suggestion: The text size can be increased slightly, as the current text looks a little small and dull. A slightly larger font size and improved contrast would enhance readability.
2. Suggestion: The bold text appears too tightly spaced, causing the letters to merge together. We can consider increasing the letter spacing slightly to improve clarity.
- 4) Animation is missing in this age as well

Legacy & Estate Planinng

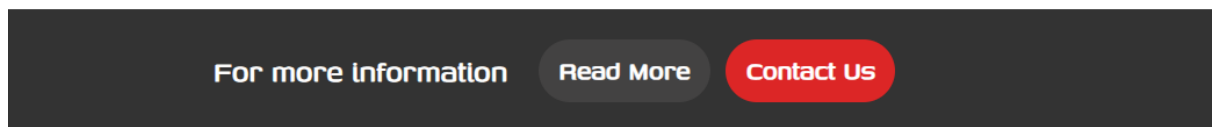

3. Suggestion: The text size can be increased slightly, as the current text looks a little small and dull. A slightly larger font size and improved contrast would enhance readability.
4. Suggestion: I observed that the animation is missing in this section as well. We can consider adding the section animation to maintain consistency with the rest of the website.

Insurance

3. Suggestion: The text size can be increased slightly, as the current text looks a little small and dull. A slightly larger font size and improved contrast would enhance readability.
4. Suggestion: I observed that the animation is missing in this section as well. We can consider adding the animation to maintain consistency across the website.

Bespoke Portfolios

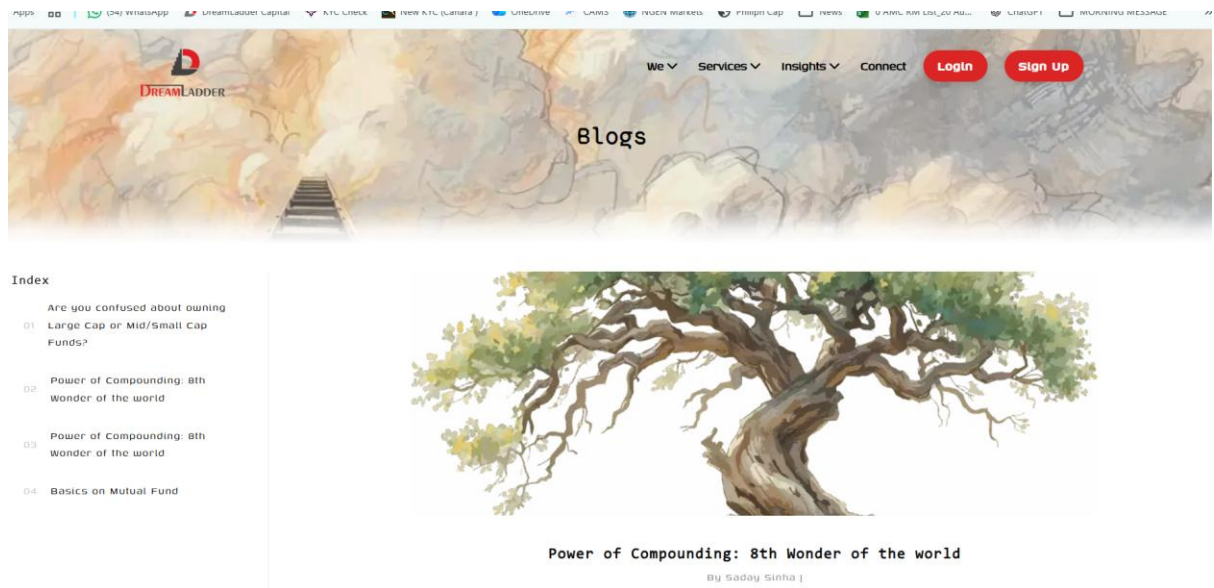

3. Suggestion: The text size can be increased slightly, as the current text looks a little small and dull. A slightly larger font size and improved contrast would enhance readability.
4. Suggestion: I observed that the animation is missing in this section as well. We can consider adding the same animation used in other sections to maintain a consistent user experience across the website.

1. Suggestion: I observed that when the cursor is moved over the **Read More** or **Contact Us** buttons, they change to a grey colour that blends with the background. We can consider using a more contrasting hover colour to improve visibility and user interaction.
2. Suggestion: I feel the gap between the sections is slightly too much. We can consider reducing the spacing to create a cleaner and more connected layout.

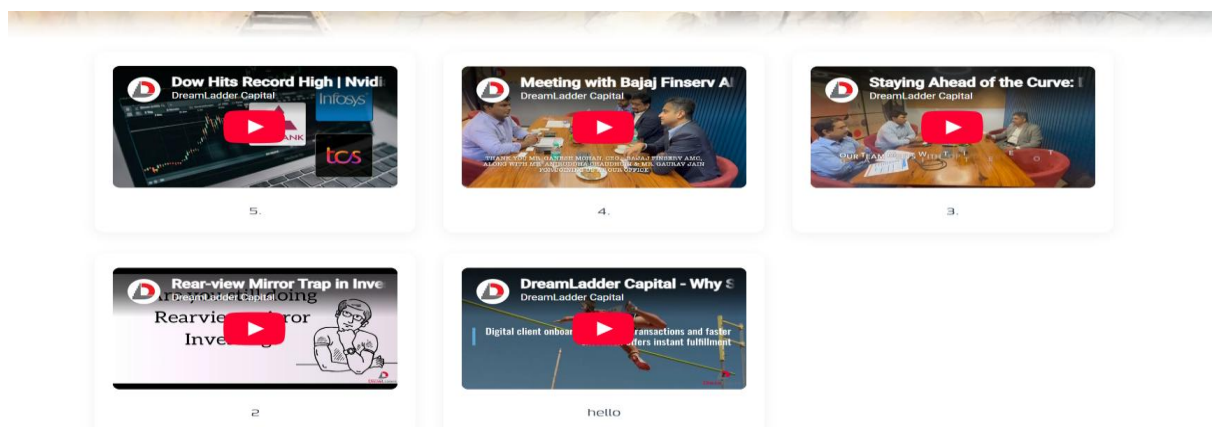

Insights

Blogs

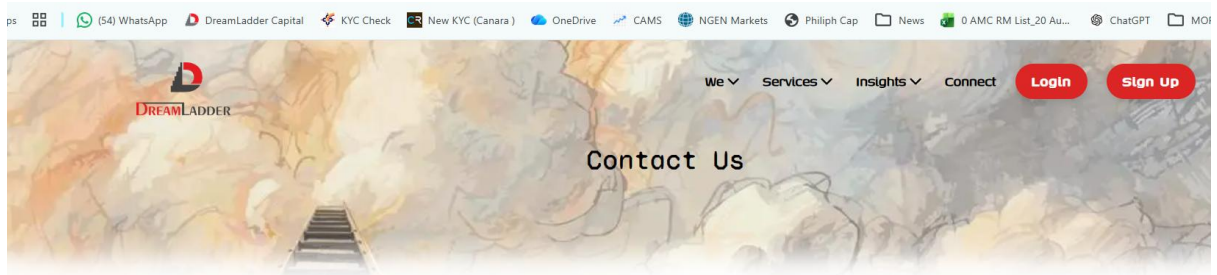

Suggestion: I observed that while the blog cards scroll, the section heading remains fixed. This affects the reading experience, as users have to read the blog content from only the lower half of the screen. We can consider making the heading scroll along with the blogs or adjusting the layout to provide a better reading experience.

Media

Suggestion: I feel adding one more video to this section would make it look more complete and visually balanced, while also providing users with additional engaging content.

Contact Us

+91 89-0808-2222

info@dreamladdercapital.com

#20, 10th floor, R. City Offices, LBS Marg,
Ghatkopar (west), Mumbai - 400086

1. Suggestion: I observed that there is no animation in this section. We can consider adding the section animation to maintain consistency with the rest of the website.
2. Suggestion: Instead of a **Schedule a Meeting** button, I feel a calendar view would provide a better user experience. It would allow clients to directly select their preferred date and time, reducing one extra step in the booking process.

Schedule a Meeting

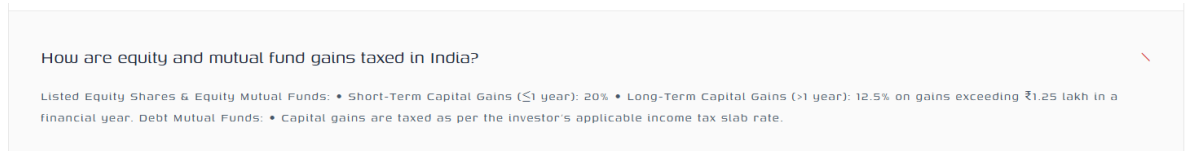

Have a Question?

Your name	Your message (optional)
Your email	
Phone	
<input type="submit" value="Submit"/>	

Suggestion: I feel the **Submit** button is not properly aligned with the other buttons in the section. Compared to the **Schedule a Meeting** button, its positioning looks slightly inconsistent. We can consider aligning it with the other buttons to maintain a clean and uniform layout.

FAQ

1. **Suggestion:** The heading text can be made slightly larger to give it better visual prominence. Also, the text underneath the heading is very small. We can consider increasing its font size to improve readability and the overall user experience.

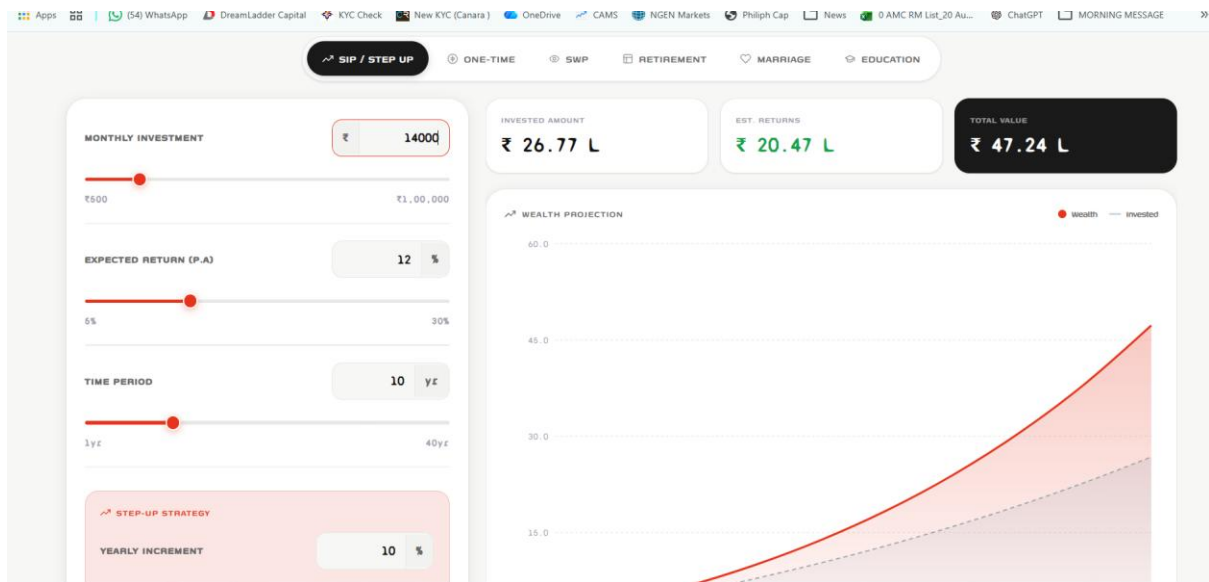

Suggestion: I observed that the bullet points have been converted into a paragraph format. We can consider restoring them as a proper bullet list, as it improves readability and makes the content easier to scan.

Privacy Policy – Disclaimer

Suggestion: I feel the subtext and paragraph text size is too small. We can consider increasing the font size slightly to improve readability and make the content more comfortable to read.

Calculator

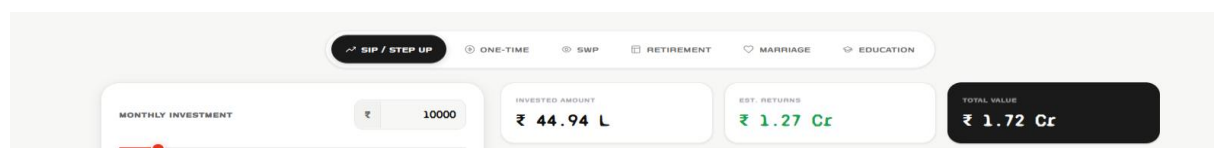

- 1) **Suggestion:** I feel the maximum monthly investment amount is a bit low. We can consider increasing the limit to ₹5 lakh to accommodate users with higher investment capacities.

- 2) **Suggestion:** I feel it would be more convenient if the graph and the calculation table on the left could fit within a single screen view. This would allow users to view the inputs and results together without scrolling, making the calculator easier to use.

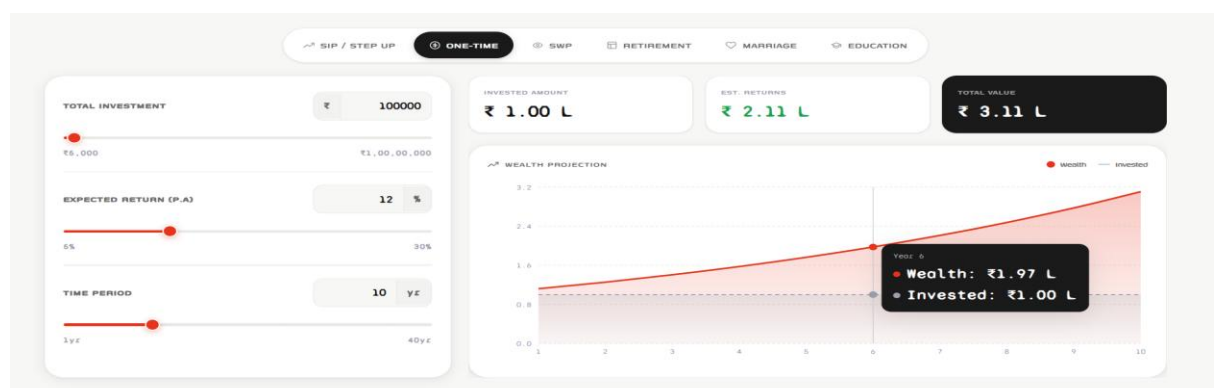

Suggestion: I feel the "Wealth" and "Invested" text appears slightly larger than the rest of the content. We can consider reducing the font size slightly to maintain better visual balance and consistency within the calculator.

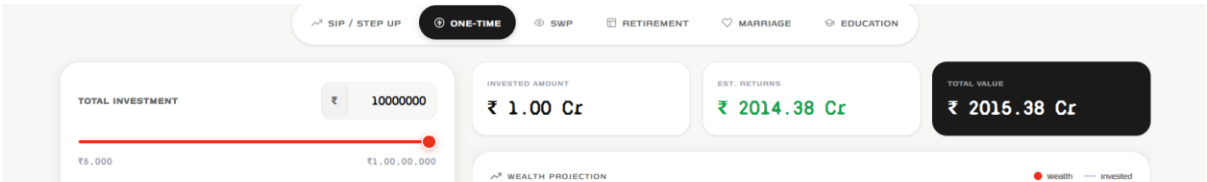

Suggestion: I observed the following improvements that can be considered across the entire calculator section:

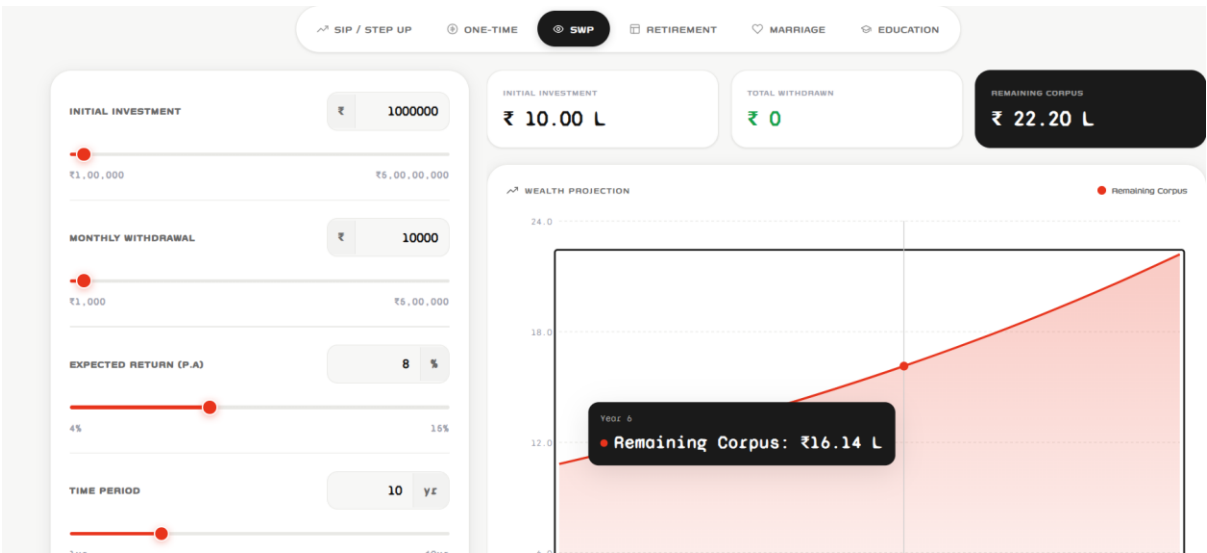

- Use a consistent unit throughout the calculator (either all **Lakhs** or all **Crores**) instead of mixing both (e.g., Invested: ₹44.94 L, Returns: ₹1.27 Cr, Total: ₹1.72 Cr).
- Apply the **Indian number format** with proper comma separators (e.g., **1,00,000** instead of **100000**) across all values.
- Ensure comma formatting is applied consistently to all displayed amounts, including **Invested Amount, Estimated Returns, Total Value**, and other output fields.
- Following a consistent number format across all calculators will improve readability and make larger values easier to understand.

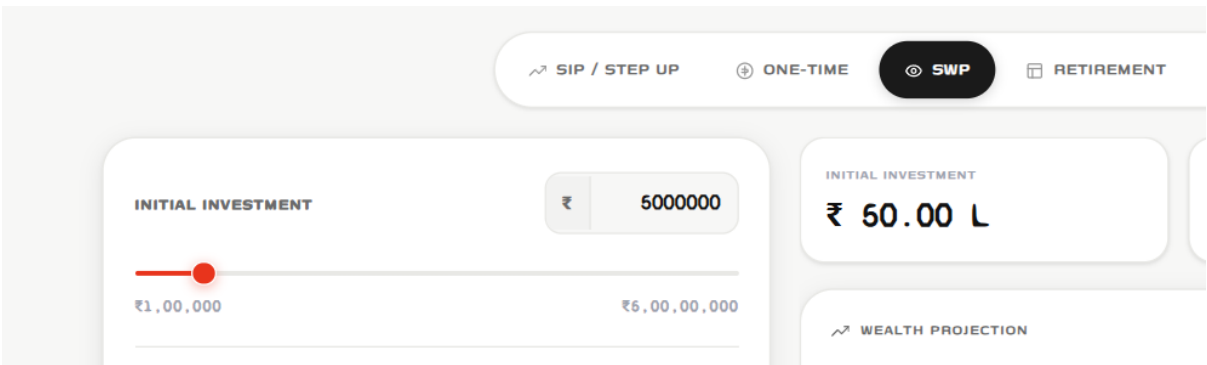

Suggestion: I observed that the **One-Time Investment Calculator** fits perfectly within a single screen. However, the value box displayed on the graph appears larger than required for the graph size. We can consider reducing the size of the box so that it is better proportioned and enhances the overall visual appearance.

Suggestion: I observed that the **Estimated Returns** and **Total Value** amounts are missing the comma separators. We can consider adding proper comma formatting to improve readability and maintain consistency across all displayed values.

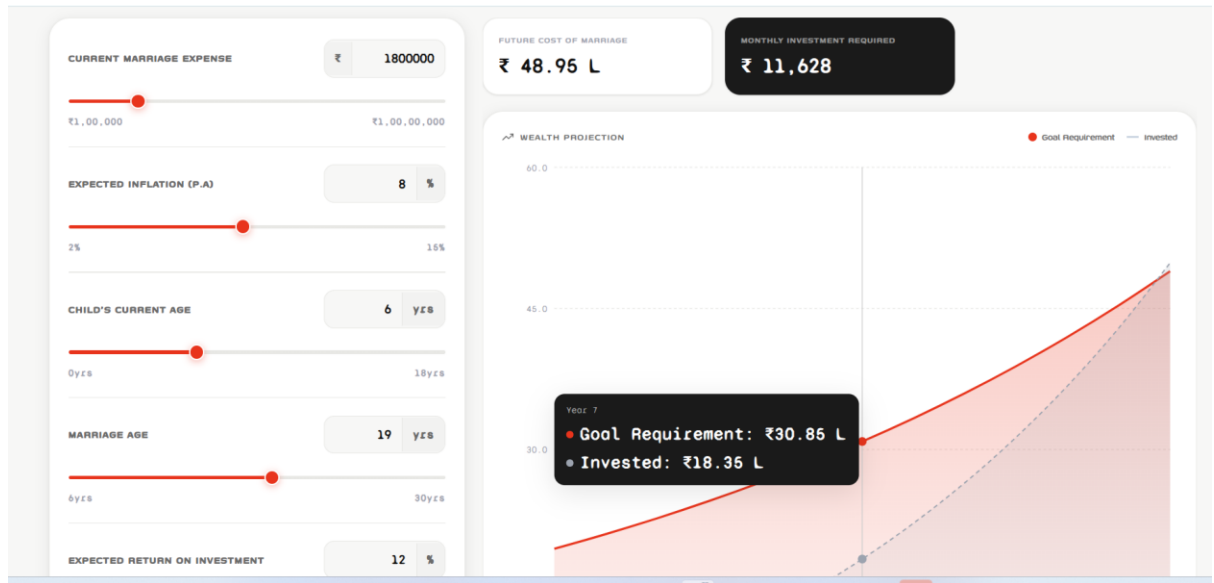

The remaining corpus text is not aligning with the graph

Suggestion: I observed that the **Initial Investment** value is displayed twice—once on the left-hand side and again above the graph section. We can consider displaying it only once to avoid duplication and make the interface cleaner.

Marriage Calculator

- 1) The marriage age should be greater than 18

Education

Suggestion: I feel the tab displayed on the graph is slightly large. We can consider reducing its size so that it looks more proportionate to the graph and improves the overall visual appearance.

Retirement

EXISTING SAVINGS

☐ Yes ☒ No

Suggestion 1: I observed that when Existing Savings = No, the inner circle is not an circle shape displayed.

Suggestion 2: Instead of "**Additional Income Needed**", we can consider changing the label to "**Required Retirement Corpus**" for better clarity and to accurately reflect the retirement goal.

<https://dreamladdercapital.co.in/calc>

when we are in calculator page – it is showing /calc

but for rest like blogs about us the whole thing is written

Suggestion: I feel it would be helpful if each calculator retained its previously entered values and slider positions, even after navigating to another calculator section.

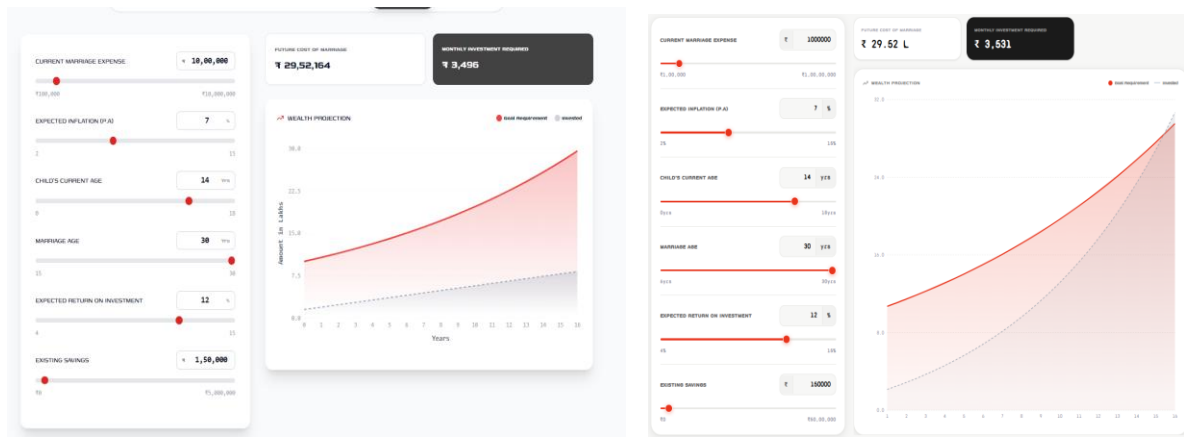

- For example, if I calculate a SIP in the **Retirement Calculator**, then move to the **SIP Calculator** and later return to the **Retirement Calculator**, the previously entered values and slider positions should remain unchanged.
- This would allow users to compare multiple financial goals without having to re-enter the same details every time.
- Many users may want to calculate two or more goals simultaneously, so preserving the inputs across calculator sections would provide a much smoother and more user-friendly experience.

Calculator check from the current and new website

1. **SIP Step-Up Calculator:** I checked the calculations on both the old and new websites. The outputs match exactly and are also consistent with calculations verified using ChatGPT and other financial calculator websites.
2. **One-Time Investment Calculator:** I checked the calculations on both the old and new websites. The outputs match exactly and are also consistent with calculations verified using ChatGPT and other financial calculator websites.

3. **SWP Calculator:** The results do not match the old website. However, the calculations match the values verified by Purnima. The SBI SWP Calculator also shows different results. The difference is mainly in the **Remaining Corpus** value.
4. **Retirement Calculator:** I checked the calculations on both the old and new websites. The outputs match exactly.
5. **Marriage & Education Calculators:** There is a slight difference in the **Monthly Investment Required** compared to the old website.
6. **All:** I observed that the input fields do not allow users to type numbers manually. Also, the value changes only in fixed increments (e.g., ₹2,500 or ₹5,000), making it difficult to enter an exact amount. For example, if I want to enter **₹1,63,000**, I can only select **₹1,62,500** or **₹1,65,000**. We can consider allowing manual input or finer adjustment steps for better usability.
7. **Mobile Observation (SIP Step-Up Calculator):** While testing on two different mobile devices, the SIP Step-Up Calculator displayed different values. The values on my phone matched the expected output, whereas Purnima's phone showed different values. This may be worth investigating to ensure consistent results across devices.
